RAINBOW HAT : Supporting a matrix of 64(8 x 8) RGB LEDs and powered directly from the RPI. 64 RGB LEDs (SK6812RGB - 5mm x 5mm). LED data driven via DMA over PWM by using Python library . Compatible with Raspberry Pi 3, 2, Zero. This is ideal for mood lighting, pixel art. Power rating 5V@50-540mA. Board **Dimensions:**65*56.5*12.3 (W*L*H in mm)

Mini-RAINBOW HAT: Supporting a matrix of 32 (8 x 4) RGB LEDs and powered directly from the RPI. 32 RGB LEDs (SK6812RGB - 5mm x 5mm)LED data driven via DMA over PWM by using Python library. Compatible with Raspberry Pi 3, 2, Zero. This is ideal for mood lighting, pixel art. Power rating 5V@50-270mA. Board **Dimensions:** 65*30.5*12.3 (W*L*H in mm)

Notes:

- Rainbow-HAT uses some special PWM trickery, performed with the same hardware that lets your Pi produce sound through the audio jack (analog audio) so you can't use both at the same time!
- **Warning:** SK6218 LEDs are bright enough to cause eye pain, do not look at them directly when brightly lit. We recommend using RAINMBOW-HAT at lower brightness levels.
